KYNAR / FLUROPON®
SPECIFICATIONS DATA SHEET

Fluoron® is a full strength 70% Kynar 500® or Hylar 5000® based coating which provides coverage for the most demanding exterior surfaces. It should be specified when highest available performance against color fade and chalk is needed.

With more than 25 years of proven field performance, Fluoron® is the most durable coating for a high performance system. It is an excellent choice for walls, roofs, soffits and other architectural applications.

Available in standard and custom earth-tone, pastel and restoration colors, Fluoron® is chemically resistant and post-formable. Fluoron® is also available in a thick-film system, Fluorothane® II and IV (see detail sheet for Fluorothane® II and IV for more information on thick-film systems).
