The details shown on the following pages are suggestions or guidelines on how to install Matrix and Marquee-Lok panels. The information shown is accurate and the installation details shown are proven methods of construction, but it is not intended to cover all instances, building requirements, designs or codes. The details may require changes or revisions due to individual project conditions. The installer should follow these recommended details using proper workmanship procedures.

It is the responsibility of the designer/installer to ensure the details meet particular building requirements and to assure adequate water-tightness. It must be noted that water-tightness is a function of the installer. McElroy Metal will be held harmless from any and all claims arising from a lack of water-tightness.

A proper uniform substructure should be used to avoid any panel distortion. All substructures should be designed to meet all necessary code requirements.

The installer should thoroughly familiarize himself/herself with all installation instructions. Before beginning installation of the panels, the installer should examine the substrate to ensure that all supporting members are straight, level and plumb.

The panels should be installed plumb, straight and accurately to the adjacent work. No penetrations shall be placed in the panel system by fasteners except as shown on the installation drawings.

McElroy Metal can provide all flashings and accessories shown in the installation drawings unless noted otherwise. Installation procedures shall be in accordance with the manufacture's printed instructions, detail or approved shop drawings. Flashing and trim shall be installed true and in proper alignment, with any exposed fasteners equally spaced for the best appearance.

Some field cutting and fitting of panels and flashings is to be expected by the installer and minor field corrections are a part of normal installation work. Workmanship shall be of the best industry standards and with installation performed by experienced metal craftsman.

Oil canning of metal panels is inherent in the product and is not a cause for rejection.

Contents of this manual are subject to change without notice. Because this manual is revised from time to time, users are advised to check the revision date to be sure they have the most current copy in print. To confirm this book is the most current copy, please visit McElroy Metal's web site at http://www.mcelroymetal.com.
GENERAL INFORMATION

FASTENER PATTERNS

1'-0" COVERAGE

12" MATRIX PANEL

1'-4" COVERAGE

16" MATRIX PANEL

MATRIX PANELS

MARQUEE-LOK PANEL

1'-0" COVERAGE
NOTES: 1. Using hand, push panel until a bow is formed in the panel.
   2. Using rubber palmed gloves and an angled forced blow, slap bow with palm of hand
to snap male leg into female leg.
   3. To verify panels without sealant are fully engaged, panels will slide lengthwise.
   4. To separate panels without sealant, slide the panels lengthwise out of the female leg.

MATRIX SOFFIT PANEL

#10-12 x 1" TYPE A PANCAKE HEAD (@1'-0" O.C.)
ANGLE TRIM

POP RIVET (@1'-0" O.C.)

NOTES:
1. Trim to start and end at building lines.
2. Attach trim to blocking with #10-12 x 1" Type A Pancake Head at 2'-0" O.C.
3. Attach panel to sheathing with #10-12 x 1" Type A Pancake Head.
NOTES:
1. Trim to start and end at building lines.
2. Attach trim to blocking with #10-12 x 1" Type A Pancake Head at 2'-0" O.C.
3. Attach panel to sheathing with #10-12 x 1" Type A Pancake Head.
NOTES:  
1. Trim to start and end at building lines. 
2. Attach trim to blocking with #10-12 x 1" Type A Pancake Head at 2'-0" O.C. 
3. Attach panel to sheathing with #10-12 x 1" Type A Pancake Head.
NOTES:
1. Trim to start and end at building lines.
2. Attach trim to blocking with #10-12 x 1" Type A Pancake Head at 2' O.C.
3. Attach panel to sheathing with #10-12 x 1" Type A Pancake Head.
NOTES:
1. Trim to start and end at building lines.
2. Attach trim to blocking with #10-12 x 1" Type A Pancake Head at 2'-0" O.C.
3. Attach panel to sheathing with #10-12 x 1" Type A Pancake Head.

McELROY METAL, INC.
TECHNICAL SERVICE
1-800-950-9082
NOTE: 1. Trim to start and end at building lines.
   2. Attach trim to wall at 2'-0" O.C.
   3. Attach panel to trim with a Pop Rivet @1'-0" O.C.
   4. Maximum panel length for this condition is 1'-0".
NOTES: 1. Trim and Cleat to start and end at building lines.
2. Attach trim to sheathing with #10-12 x 1" Type A Pancake Head at 2'-0" O.C.
3. Attach cleat to sheathing with #10-12 x 1" Type A Pancake Head at 1'-0" O.C.
4. Attach panel to sheathing with #10-12 x 1" Type A Pancake Head.
NOTES: 1. Field notch male leg 0'-2" from end of panel and 0'-2" from edge of panel.
2. Field notch female leg 0'-2" from end of panel.
3. Field Apply a bead of Butyl Tube Sealant as shown in detail. Size and placement of bead will be determined by installer so that lap is sealed without sealant oozing from the joint.
4. Laps must be staggered a minimum of 2'-0".
NOTES: 1. Trim to start and end at building lines.
   2. Attach panel to sheathing with #10-12 x 1" Type A Pancake Head.
   3. Attach trim to panel with Pop Rivet @1'-0" O.C.
NOTES: 1. Trim to start and end at building lines.
    2. Attach panels to sheathing with #10-12 x 1” Type A Pancake Head.
    3. Attach trim to panels with Pop Rivet @1'-0" O.C.
NOTES:
1. Attach trim to sheathing with #10-12 x 1" Type A Pancake Head @2'-0" O.C.
2. Attach panels to sheathing with #10-12 x 1" Type A Pancake Head.
NOTES: 1. Attach trim to sheathing with #10-12 x 1" Type A Pancake Head @2'-0" O.C.
2. Attach panels to sheathing with #10-12 x 1" Type A Pancake Head.
NOTES: 1. Attach trim to sheathing with #10-12 x 1" Type A Pancake Head @2'-0" O.C.
2. Attach panels to sheathing with #10-12 x 1" Type A Pancake Head.
NOTES: 1. Trim to start and end at building lines.
2. Attach trim to blocking with #10-12 x 1" Type A Pancake Head at 2'-0" O.C.
3. Attach panel to sheathing with #10-12 x 1" Type A Pancake Head.
