

Wave

Fixed or Floating Panels

Available in both fixed and floating systems, McElroy Metal's Wave panels are concealed fastener wall panels that can be installed vertically or horizontally over solid substrate or subframing. Wave Fixed is installed with Wave's integral fastening flange which is roll formed into the panel during the manufacturing process and can be utilized for panels length 40' or less. Wave Floating panels utilize separate clips and should be specified for panel lengths 40' or greater.

PRE-NOTCHED WAVE FLASHING

Wave pre-notched transition flashings allow for thermal expansion and contraction while providing an attractive finishing detail. Pre-notched corner flashing is also available.
